

Installation:

Feed the light leads through the stem, then secure the stem to the lamp as shown below.

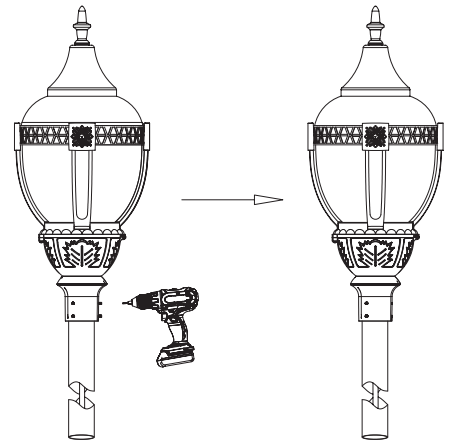

Turn off the power, then connect the wires using a terminal cap (see wiring instructions below), as shown.

Black L	AC L
White N	AC N
Green GND	Green GND
Purple DIM+	Purple DIM+
Pink DIM-	Pink DIM-

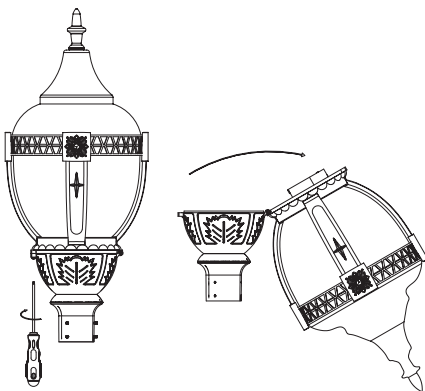

Pass the light leads through the tenon pole, then secure it with screws as shown below.

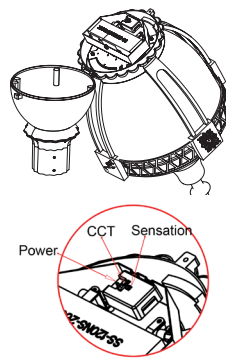

Adjust wattage and color temperature:

Use a screwdriver to remove the fixing screws, as shown below.

Set the color temperature switch to the desired setting, then adjust the power switch to the required wattage. The light sensitivity switch function is illustrated below.

Reassemble the installation by following the steps in reverse order, as shown below.
